disclosed

Consequences

What are the outcomes — who is helped, who is harmed, and by how much?

Duty & Rights

What do we owe people regardless of outcome — were they used merely as a means?

Virtue

What does this practice make of us — what kind of institution or person does it cultivate?

Justice

How are benefits and burdens distributed — and who holds power over whom?

WHERE THE LENSES MEET

Converge

Where two or more lenses point the same way.

Diverge

Where they pull apart — the disagreement is information, not failure.

Question

What you'd need to decide it: a missing fact, a value, a boundary.

When the lenses disagree, the disagreement is information, not failure. Reason well without certainty.
